

A Message from Mayor Nick Russo - Longport Water Tower Maintenance - Potential Water Pressure Reduction and Discoloration During Work Period Beginning November 27, 2024

Dear Longport Residents,

Please be aware that on or about Wednesday, November 27th, the water tower will be taken offline in order to make necessary interior repairs, including painting. You may experience some pressure loss in your water system. This is due to the direct feeding of water without the help of the water tower to maintain consistent pressure. You may also experience water discoloration during this time. Discoloration is temporary and residents are advised to let the water run until it clears. Please take this into consideration when washing laundry, especially lighter colors.

The Longport Public Works Department will be working on maintaining constant water pressure throughout the water tower project. We apologize for any inconvenience this may cause and thank you for your understanding.
